

Ergonomic large button telephone tiptel ergovoice 240

The tiptel ergovoice 240 with its particularly large, contrasting buttons is very easy and safe to use. Both the number buttons and the three speed dial buttons are designed with a clear curve, which provides an additional guidance aid during the dialing process.

The handset has also been designed for ideal ergonomics and is therefore easy to pick up.

Depending on requirements you can change the caller's volume or your outgoing voice at the touch of a button.

The handset is also equipped with a magnetic field generator for hearing aids. If help is required quickly, the tiptel ergovoice 240 has a special emergency button to dial an individually programmable call number with hands-free operation.

- Very large buttons
- Curved number and speed dial buttons for safe operation
- Handset can be easily gripped
- Compatible with hearing aids: handset with integrated magnetic field generator
- Loud ring tone can be set
- Clear light signal for an incoming call
- Emergency call button for a personal call number (dial and activate the hands-free function by pressing a single button)
